

Collected Knowledge & Wisdom on

# MySportsFeeds

---

## Provides:

Consistent data for NFL, MLB, NBA, and NHL including Scoreboard, Boxscores, Schedules, Standings, Injuries and more.

## Key Provisioning:

**Pain factor** (*0=easy...5=nightmare*): **3**

- User must create an account on mysportsfeeds.com
- User must add a new API key on their profile page
- Users are registered as commercial accounts by default. Contact them at <https://www.mysportsfeeds.com/contact-us> to apply for non-commercial use

## Quotas:

- 100 requests per day

---

## The Good:

- Users can have multiple API keys
- Each Key can be tailored to show results for different leagues
- Thorough documentation with tutorials
- Non-commercial use is free
- All the major American sports in a single API

## The Bad:

- Requires you to pay for real-time/live game results
- The JSON file contains a lot of data which makes it hard to read if it's printed out in a terminal.
- Have to wait 1-2 days for non-commercial use verification

## The Ugly:

- Server will return a 403 Status Code if users go over request limit
